

Suspension of CTCA Registration Policy

The Conjoint Committee for the Recognition of Training in CT Coronary Angiography (CTCA) is a multidisciplinary committee responsible for setting training requirements for the provision of CT Coronary Angiography (CTCA) services in Australia and New Zealand for medical practitioners with current specialist recognition in Cardiology, Nuclear Medicine or Radiology.

Specialists seeking to provide these services may apply to the Conjoint Committee for recognition of their training in CTCA. Successful applicants gain registration as a CTCA Specialist for a period of three years. Evidence of ongoing competency in CTCA will need to be provided to the Conjoint Committee triennially by each registered CTCA Specialist for Recertification of CTCA registration.

Recognised CTCA Specialists may seek to formally suspend their CTCA Registration on compassionate grounds for a period of up to twelve months during their three year recertification cycle. Reasons for CTCA Registration suspension may include sabbatical leave, maternity leave or illness. Any CTCA cases performed during the period of suspension by the CTCA Specialist will not be eligible for use in their recertification logbook, and Medicare Australia will be advised of the CTCA Specialist's temporary suspended registration. The validity of 'compassionate grounds' will be considered on a case-by-case basis by the Committee where these are ambiguous.

Applications for Suspension of CTCA Registration are assessed by the Conjoint Committee for the Recognition of Training in CT Coronary Angiography (CTCA). Following the approval of an application for suspension of registration, applicants will be notified and suspended from the CTCA Register until their suspension period concludes. When the specialist's suspension concludes, Medicare will be informed.

Please send your completed application form and any supporting documentation to:
